The applications listed here are a small sampling of areas where you can blend process components and interactive polling technologies to achieve your objectives.

Corporate Training and Classroom Learning

Continuing Medical and Professional Education

Employee Perception Surveys

Electronic Voting

Town Hall Meetings

Decision Support

Logos Av Com Televoter System

Interactive meetings are shown to improve attendee attentiveness up to 88% and increase retention as much as 27%.

Audience response systems are also perfect for meetings where assessment, decision-making or voting must be conducted quickly.

Logos AV Com is a well-established and extensively used brand of interactive audience response solutions.

It creates an instant exchange of thoughts and ideas that would otherwise be impossible.

Why Use Televoter Systems?

Because each participant has a means of expression and becomes fully involved in it.

It can help you to increase the productivity of your meetings by stimulating participation.

You can hold interactive meetings with groups from 10 to 16.000 people.

It allows you to do so much more than you could at a traditional meeting.

Working “live” helps to improve the way you adapt to your audience’s expectations.

Qualification

Benefits of Multiantenna system

Radio Coverage guaranteed

- Multiantenna system, gives the possibility to set up as many antennas as necessary for a perfect radio coverage.

100% Reliability guaranteed

- Each vote, when sent, is received by more than one antenna.
- Attendants are free to move because only one frequency is used.

Check control system

- Our system is the only one capable to check the presence in the meeting room; before, during and after each voting session.
- A “Stand By” status is designed, after pad switching on, to allow the pad to answer, at any time it is requested, without involving the attendants.

These three features are the base for **legal shareholding meeting**, giving the possibility:

- ✓ To test legal presence in the voting area and good functionality of pads before to open the session.
- ✓ To have a perfect radio coverage
- ✓ To receive the single vote with more antennas
